from their 2010/11 review.

The following points were noted:

- The target for the number of new clients taking up the service for 2011/12 was 750. This target was exceeded with 1,178 new users joining the service during 2011/12.
- Although this was the first year, take up was very encouraging particularly amongst the older population

Evidence of savings achieved to date

- Data showed that a significant reduction in new long term residential and nursing care placements in 2011/12; the average falling from 8.08/week in 2010 to 3.77/week to end of March 2012; this included all adult social care placements.
- The number of people currently in receipt of long term Residential/Nursing placements for Older People had significantly reduced and in total the headcount was now at its lowest level since April 2009, representing a reduction of 112 placements since October 2010
- Evidence of the effectiveness of TeleCareLine and Reablement could also be measured by a reduction in spend of £460k (to £7.9m) for Homecare purchased in 2011/12 when compared with 2010/11
- An additional internal evaluation exercise was undertaken for a sample of new level 3 & 4 clients who joined the service between 1st April 2011 & 31st March 2012. The analysis covered 195 clients and the considered the impact of TCL on supporting their needs for the period from the point the service was installed to 31st March 12. The results indicated:
