

Information Pack Five – Organisational Structure

Community mental health services in Hillingdon are delivered jointly through an integrated health and social care service. Joint teams include a combination of Consultant psychiatrists, social workers and community psychiatric nurses (CPNs). Services are arranged under Service Lines – which is a consistent format that cuts across all the London Boroughs that the Central and North-West London Mental Health Foundation Trust (CNWL) serves. An overview diagram is provided on the next page. The Service lines of particular relevance to this Review are:

- Assessment and Brief Treatment - usually the first point of contact when a person is referred on by Primary care Services
- Community Recovery – the team responsible for supporting people following a hospital admission
- Rehabilitation – the team that supports people who are living in residential and nursing home care

The Service Director responsible for Assessment and brief treatment across the whole Trust is also the Borough Director for Hillingdon. Within each of the service lines there is a team manager and who has day-to-day management responsibility for the management of CPNs and Social Workers. They are supported by Team Leaders. Some are CNWL employees and some are employed by the Council

To support and oversee the professional and statutory responsibilities of the Council there is a Service Manager which is a new post. Recruitment for this post is currently taking place.

Significant resources are invested in both the voluntary and independent sectors. These services are both preventative and support recovery. They include advice giving services, employment and skills support and leisure services that assist people back into everyday life. Significant resources are invested in residential and nursing home care. Please see Information Pack 3.3 for details of expenditure
