Background

What is community cohesion?

DRAFT APPENDIX 1

Community cohesion is about a creating a sense of belonging, valuing diversity, tackling inequalities and promoting interaction to develop positive relationships within a community.

The Institute of Community Cohesion uses the definition:

“community cohesion is widely used to describe a state of harmony or tolerance between people from different backgrounds living within a community. Linked to the concept of social capital and the idea that if we know our neighbours and contribute to community activity then we are more likely to look out for each other, increase cohesion and minimise cost of dependency on institutional care”

In addition community cohesion is about relationships within communities, and about addressing differences between people, that may sometimes cause division, misunderstanding or tensions that, in turn, affect the way that communities interact with one another and see themselves. This is not exclusive to ethnic or faith groups but can also include, for example, the perceptions of young people and anti-social behaviour or socio-economic differences and how they can influence social interactions and involvement in community life.

Reasons for the review

The impact of the economic downturn has inevitably placed a strain on families and communities as resources are reduced and opportunities for employment and prosperity reduced. Adhered to this are the austerity measures which the public sector has been subject to, which will have had some impact on the delivery of services, possibly to the most vulnerable in the Borough.

Threats from extremism and terrorism are still real and can cause conflict, tensions, prejudice and misunderstanding within communities, particularly in these difficult times

Hillingdon has become more diverse with many areas seeing the proportion of white and ethnic minority communities more evenly spread. At the same time the Borough is experiencing increases in the number of young people and a growing older population.

The Council’s approach, therefore, has been to understand what our community cohesion challenges are in Hillingdon and where in the Borough, risks to community cohesion are greatest. The review could explore this.

Supporting the Cabinet & Council’s policies and objectives

This review will support the work of the Council as part of its Equality Duties to ensure promotion of good relations.

DRAFT APPENDIX 1

To deliver upon the objectives of the Sustainable Community Strategy with partners.

To deliver excellent services to our residents and achieve our aim of putting residents first.

Intelligence

The Government has recently published its integration strategy: *“Creating the conditions for integration”*

This strategy outlines the Government’s aim in promoting an integrated society, where everyone can play a full part in local and national life. Where people from different backgrounds treat each other with respect and contribute together. : *“integration is achieved when neighbourhoods, families and individuals come together on issues which matter to them”*

The strategy has outlined the key factors for integration as:

Common Ground : a clear sense of shared aspirations and values which focus on what we have in common rather than our difference.

Responsibility: a strong sense of our mutual commitments and obligations, which bring personal and social responsibility

Social mobility: people able to realise their potential to get on in life

Participation and empowerment: people of all backgrounds have the opportunities to take part, be heard and take decisions in local and national life

Tackling intolerance and extremism: a robust response to threats, whether discrimination, extremism or disorder that deepen division and increase tensions.

The Government highlight the link between community cohesion and integration, but issues relating to inequality and individuals experience are also important in enabling positive interaction and relationships in communities.
