**Email:** [vboorman@hillingdon.gov.uk](mailto:vboorman@hillingdon.gov.uk)

### **REASON FOR ITEM**

At its meeting on 20 November 2014 the committee requested that regular updates on the Council's response to flooding be added to its work programme.

### **INFORMATION**

Since the November meeting there have been no major flood events in the Borough. Another Flood Investigation Report, on the significant flooding which happened on 28 July 2014, has been published on the Hillingdon website. Information for the report was gathered directly from residents as well as from the Contact Centre. The report is appended to this paper.

The map setting out ownership and responsibilities for larger drainage infrastructure such as ditches and trash screens remains a work in progress.

The Hillingdon Flood Risk Management Strategy, which members were informed about at the last meeting, has now been drafted and is being reviewed by officers, before wider consultation takes place.

### **RECCOMENDATION**

1. That the committee note the report.
