Date Plans Received: 26/10/2015 **Date(s) of Amendment(s):** 26/10/2015
Date Application Valid: 26/10/2015 16/12/2015

1. SUMMARY

The application seeks to discharge the reserved matters relating to appearance and landscaping in compliance with conditions 2 and 3 of planning permission ref. 59872/APP/2013/3775 for of Phase 2 of The Old Vinyl Factory Masterplan: The Material Store.

The application site forms part of The Old Vinyl Factory site for which outline consent was granted under application reference 59872/APP/2012/1838, and varied under application reference 59872/APP/2013/3775, for the mixed-use redevelopment of the site.

The Reserved Matters application site is located centrally within the wider site, directly to the south of the Power House (formerly known as the Neptune) which is a locally listed building.

The Materials Store site has already been granted Reserved Matters consent under application reference 59872/APP/2015/1329 (dated 7th August 2015). However the applicant would like to make some changes to the approved scheme, including the provision of six additional units along with internal layout and elevation alterations.

The proposed development has been designed in accordance with the parameter plan and design code, which were approved at outline stage. The design and appearance of the building is considered to have a positive impact on the visual amenities of the surrounding area and the urban form of the development has improved since the outline stage.

The overall development is in accordance with the outline consent and varies only minimally from the already consented Reserved Matters Application. Therefore, the application is recommended for approval.

2. RECOMMENDATION

APPROVAL subject to the following:

1 COM4 Accordance with Approved Plans

The development hereby permitted shall not be carried out except in complete accordance with the details shown on the submitted plans, numbers:

and shall thereafter be retained/maintained for as long as the development remains in existence.

REASON

To ensure the development complies with the provisions Hillingdon Local Plan: Part Two Saved UDP Policies (November 2012) and the London Plan (2015).

2 COM5 General compliance with supporting documentation

The development hereby permitted shall not be occupied until the following has been completed in accordance with the specified supporting plans and/or documents:

Design and Access Statement October 2015 (document reference no. 14034-99-001-P)

Bird Hazard Management Plan

Landscape Maintenance and Management Plan Rev 1

Thereafter the development shall be retained/maintained in accordance with these details for as long as the development remains in existence

REASON

To ensure that the development complies with the objectives of Policies . Specify Hillingdon Local Plan: Part Two Saved UDP Policies (November 2012)

INFORMATIVES

1 I52 Compulsory Informative (1)

The decision to GRANT planning permission has been taken having regard to all relevant planning legislation, regulations, guidance, circulars and Council policies, including The Human Rights Act (1998) (HRA 1998) which makes it unlawful for the Council to act incompatibly with Convention rights, specifically Article 6 (right to a fair hearing); Article 8 (right to respect for private and family life); Article 1 of the First Protocol (protection of property) and Article 14 (prohibition of discrimination).

2 I53 Compulsory Informative (2)

The decision to GRANT planning permission has been taken having regard to the policies and proposals in the Hillingdon Unitary Development Plan Saved Policies (September 2007) as incorporated into the Hillingdon Local Plan (2012) set out below, including Supplementary Planning Guidance, and to all relevant material considerations, including the London Plan (2015) and national guidance.

AM13	AM13 Increasing the ease of movement for frail and elderly people and people with disabilities in development schemes through (where appropriate): - (i) Dial-a-ride and mobility bus services (ii) Shopmobility schemes (iii) Convenient parking spaces (iv) Design of road, footway, parking and pedestrian and street furniture schemes
AM14	New development and car parking standards.
AM15	Provision of reserved parking spaces for disabled persons

AM2	Development proposals - assessment of traffic generation, impact on congestion and public transport availability and capacity
AM7	Consideration of traffic generated by proposed developments.
AM8	Priority consideration to pedestrians in the design and implementation of road construction and traffic management schemes
AM9	Provision of cycle routes, consideration of cyclists' needs in design of highway improvement schemes, provision of cycle parking facilities
BE13	New development must harmonise with the existing street scene.
BE15	Alterations and extensions to existing buildings
BE18	Design considerations - pedestrian security and safety
BE19	New development must improve or complement the character of the area.
BE20	Daylight and sunlight considerations.
BE21	Siting, bulk and proximity of new buildings/extensions.
BE22	Residential extensions/buildings of two or more storeys.
BE23	Requires the provision of adequate amenity space.
BE24	Requires new development to ensure adequate levels of privacy to neighbours.
BE25	Modernisation and improvement of industrial and business areas
BE3	Investigation of sites of archaeological interest and protection of archaeological remains
BE38	Retention of topographical and landscape features and provision of new planting and landscaping in development proposals.
BE4	New development within or on the fringes of conservation areas
H4	Mix of housing units
H5	Dwellings suitable for large families
H6	Considerations influencing appropriate density in residential development.
H8	Change of use from non-residential to residential

R7	Provision of facilities which support arts, cultural and entertainment activities

3 159 **Councils Local Plan : Part 1 - Strategic Policies**

On this decision notice policies from the Councils Local Plan: Part 1 - Strategic Policies appear first, then relevant saved policies (referred to as policies from the Hillingdon Unitary Development Plan - Saved Policies September 2007), then London Plan Policies (2015). On the 8th November 2012 Hillingdon's Full Council agreed the adoption of the Councils Local Plan: Part 1 - Strategic Policies. Appendix 5 of this explains which saved policies from the old Unitary Development (which was subject to a direction from Secretary of State in September 2007 agreeing that the policies were 'saved') still apply for development control decisions.

4 160 **Cranes**

Given the nature of the proposed development it is possible that a crane may be required during its construction. The applicant's attention is drawn to the requirement within the British Standard Code of Practice for the safe use of Cranes, for crane operators to consult the aerodrome before erecting a crane in close proximity to an aerodrome. This is explained further in Advice Note 4, 'Cranes and Other Construction Issues' (available at www.aoa.org.uk/publications/safeguarding.asp)

5

Waste Requirements

Arrangements should be made for the cleansing of the bin stores with water and disinfectant. A hose union tap should be installed for the water supply. Drainage should be by means of trapped gully connected to the foul sewer. The floor of the bin store area should have a suitable fall (no greater than 1:20) towards the drainage points.

The material used for the floor should be 100 mm thick to withstand the weight of the bulk bins. Ideally the walls of the bin storage areas should be made of a material that has a fire resistance of one hour when tested in accordance with BS 472-61.

The gate/door of the bin stores need to be made of metal, hardwood, or metal clad softwood and ideally have fire resistance of 30 minutes when tested to BS 476-22. The door frame should be rebated into the opening. Again the doorway should allow clearance of 150mm either side of the bin when it is being moved for collection. The door(s) should have a latch or other mechanism to hold them open when the bins are being moved in and out of the chamber.

f) Internal bin chambers should have appropriate passive ventilators to allow air flow and stop the build up of unpleasant odours. The ventilation needs to be fly proofed.

g) If the chambers are inside the building they should have a light. The lighting should be a sealed bulked fitting (housings rated to IP65 in BS EN 60529:1992).

h) The collectors should not have to cart a 1,100 litre bulk bin more than 10 metres from the point of storage to the collection vehicle (BS 5906 standard).

i) The gradient of any path that the bulk bins have to be moved on should ideally be no more than 1:20, with a width of at least 2 metres. The surface should be smooth. If the storage area is raised above the area where the collection vehicle parks, then a dropped kerb is needed to safely move the bin to level of the collection vehicle.

k) The access roads must be able to with stand the weight of a 26 tonne refuse collection vehicle.

3. CONSIDERATIONS

3.1 Site and Locality

The whole of The Old Vinyl Factory (TOVF) site consists of approximately 6.6 hectares of land set in an irregular quadrilateral shaped site. The multi-phase site was originally constructed between 1907 and 1935 by the Gramophone Company and was later the production centre of EMI Ltd, producing the majority of vinyl records for distribution worldwide. Associated record production works had ceased by the 1980s after which time the site has been largely vacant with many buildings falling into disrepair.

The Reserved Matters application site is located centrally within the wider site, directly to the south of the Power House (formerly known as the Neptune) which is a locally listed building. The wider site is bounded by Blyth Road to the north and by the Great Western Mainline railway to the South, with Hayes and Harlington rail station 420 metres to the east of the site. Opposite the site on Blyth Road lies the Grade II Listed Enterprise House, an eight storey office building, together with a variety of industrial and office buildings. The wider area is a mixture of residential, industrial and office uses with Hayes Town Centre located to the northeast of the site.

This application site comprises some 5ha and excludes the three largest employment buildings located to the south of the site, The Shipping Building, The Cabinet Building and The Record Store. This is because the refurbishment of these buildings has already been approved in earlier permissions.

Many of the existing buildings are in a derelict condition arising from long term vacancy. They require a substantial investment to return them to a habitable and thus lettable state. The public realm is dominated by a large extent of tarmac surfacing providing for surface car parking.

Much of the application site, as well as The Record Store, The Cabinet Building and The Shipping Building, which lie immediately outside of the application boundary, is situated within a Developed Area, The Botwell: Thorn EMI Conservation Area and partly within a Industrial and Business Area, as identified in the Policies of the Hillingdon Local Plan (November 2012) and a Strategic Industrial Location (SIL) as designated within the London Plan (March 2015).

3.2 Proposed Scheme

The application seeks to discharge the reserved matters relating to appearance and landscaping in compliance with conditions 2 and 3 for Phase 2 of The Old Vinyl Factory Masterplan - The Materials Store.

The Materials Store site has already been granted Reserved Matters consent under application reference 59872/APP/2015/1329 (dated 7th August 2015). However the applicant would like to make some changes to the approved scheme, including the provision of six additional units with internal layout and elevation alterations.

In summary, compared to the approved RMA scheme, the revised proposal includes:

- Introduction of a new 'triplex' residential unit arranged across three storeys (lower ground, ground and first floor), 23 of these units are proposed in the current application, as opposed to the 18 approved two storey units (over ground and first floor);
- 1 additional studio unit on the first floor
- 1 additional garden room amenity area at first floor
- Reconfigured parking area at lower ground and ground floor to provide 177 car parking spaces (an additional two spaces);
- Increase in cycle parking spaces from 202 to 213.

The introduction of the 'triplex' units results in the need for modifications to the elevations of the approved scheme. The entrance to the individual units would be via steps to a slightly raised ground floor, allowing the creation of light wells to proposed lower ground floor bedrooms.

Otherwise, subject to minor internal layout changes the proposed scheme is as previously approved under application reference 59872/APP/2015/1329, with four residential blocks, over a plinth of part commercial and part parking. The amended Material Store would consist of 189 residential units of 1, 2 and 3 bed apartments spreading over 10 floors. There are 459sqm of commercial floorspace on the ground and first floor that would fall within use classes A1, A2, A3, A4, A5 or B1. Parking will be provided over two levels centrally within the building with additional on-street parking proposed externally.

Overall heights and massing principles have been established in the outline planning consent, with 4 distinct blocks sitting above a clearly defined 2 storey podium which links the blocks together. The two storey base contains double height commercial space along the northern frontage to The Groove, and service and residential space at ground and first floors respectively to the southern railway frontage. Side streets, along Powerhouse and Pressing Plant Lane, are now proposed to be lined with triplex family units at Lower Ground, Ground and First Floor Levels. This allows the base to be expressed as a distinct element and different from the residential blocks above podium level. From Level 2 up, the four blocks house simply stacked apartments and rise to different heights allowing variation against the skyline and relationships to surrounding buildings and established datum levels as set out in the approved masterplan and amendments as approved under application reference 59872/APP/2015/1330.

3.3 Relevant Planning History

Comment on Relevant Planning History

The application site forms part of The Old Vinyl Factory site for which outline consent was granted under application reference 59872/APP/2012/1838.

Application reference 59872/APP/2013/3640 granted permission for a non-material amendment to the scheme, due to the proposed revised phasing of the site, and some revisions to documents. This resulted in changes to the wording of conditions 6, 18, 27, and 32 of the original planning permission.

Application reference 59872/APP/2013/3775 granted a variation of the original outline permission to allow variations to phasing of the approved development.

Application reference 59872/APP/2015/1330 granted a Non-material Amendment to planning

permission ref: 59872/APP/2013/3775 to amend the approved parameter plans and Development Specification (condition 31) and amend the wording of Condition 13 (acoustic buffering) in connection with the Material Store development.

This reserved matters application is therefore submitted as Phase 2 of the revised application, as allowed as per reference 59872/APP/2013/3775 and 59872/APP/2015/1330

As stated above, the Materials Store site has already been granted Reserved Matters consent under application reference 59872/APP/2015/1329 (dated 7th August 2015).

6. Consultations

External Consultees

Consultation letters were sent to 115 local owner/occupiers, the Hayes Village Conservation Panel and the Hayes Town Centre Residents Association on 10/11/2015. The application was also advertised by way of site and press notices. No responses have been received.

HEATHROW AIRPORT LIMITED (HAL):

I can confirm that the introduction of the additional units create no further safeguarding concerns. Therefore, I have no safeguarding objections to the above application or the proposed amendments to this development.

METROPOLITAN POLICE:

In relation to the Design and Access Statement section 13.1 (Secure by Design), I think these comments are appropriate and acceptable.

NATIONAL AIR TRAFFIC SERVICES:

The proposed development has been examined from a technical safeguarding aspect and does not conflict with our safeguarding criteria. Accordingly, NATS (En Route) Public Limited Company ("NERL") has no safeguarding objection to the proposal.

Internal Consultees

ENVIRONMENTAL PROTECTION UNIT:

No objection as the proposal does not concern EPU

FLOOD AND WATER MANAGEMENT OFFICER:

No objection

TREES AND LANDSCAPE OFFICER:

The NLP's letter of 26 /10/2015 confirms that the revised scheme follows the public realm and landscape principles as agreed for the Old Vinyl Factory Masterplan. Part of the public realm layout is The Groove, which is shared public realm with the Boiler House and will be delivered in a single phase shared to ensure a seamless finish.

The landscape concept and objectives are described in section C. Landscape, of the Design & Access Statement. This describes the treatment of the podium and roof terrace as well as the ground level and public realm.

Drawings by BD landscape Architects include the Podium Landscape Plan, ref. BD 0120SD 801 R06, Soft Landscape Plan dwg ref. SD 002 R01, Hard Landscape Plan, dwg ref. SD 801 R01, Play Strategy Detail Plan, dwg. Ref. SD 802 R01, Planting Plan dwg. Ref. SD 003 R01.

Drawings by SEW include drawings and illustrative sections through the site, and hard and soft plans for The Groove.

The submission is supported by two documents: Specification of Planting and Soft Works which covers the first 24 months of maintenance by the main (implementation) landscape contractor. The site will then be handed over to the Building Management Group, guided by the Landscape Maintenance & Management Plan.

Neither specification refers to the need for an annual check on plant health and the need to replace any planting which fails. This clause should be added.

No objection, subject to the above detail.

Case Officer comment:

The Landscape Maintenance and Management Plan has now been revised to include the clause requested.

WASTE OFFICER:

The Council tends to use 1,100 litre eurobins for residential properties.

I would recommend arrangements should be made for the cleansing of the bin stores with water and disinfectant. A hose union tap should be installed for the water supply. Drainage should be by means of trapped gully connected to the foul sewer. The floor of the bin store area should have a suitable fall (no greater than 1:20) towards the drainage points.

The material used for the floor should be 100 mm thick to withstand the weight of the bulk bins. Ideally the walls of the bin storage areas should be made of a material that has a fire resistance of one hour when tested in accordance with BS 472-61.

The gate/door of the bin stores need to be made of metal, hardwood, or metal clad softwood and ideally have fire resistance of 30 minutes when tested to BS 476-22. The door frame should be rebated into the opening. Again the doorway should allow clearance of 150 mm either side of the bin when it is being moved for collection. The door(s) should have a latch or other mechanism to hold them open when the bins are being moved in and out of the chamber.

f) Internal bin chambers should have appropriate passive ventilators to allow air flow and stop the build up of unpleasant odours. The ventilation needs to be fly proofed.

g) If the chambers are inside the building they should have a light. The lighting should be a sealed bulked fitting (housings rated to IP65 in BS EN 60529:1992).

h) The collectors should not have to cart a 1,100 litre bulk bin more than 10 metres from the point of storage to the collection vehicle (BS 5906 standard).

i) The gradient of any path that the bulk bins have to be moved on should ideally be no more than 1:20, with a width of at least 2 metres. The surface should be smooth. If the storage area is raised above the area where the collection vehicle parks, then a dropped kerb is needed to safely move the bin to level of the collection vehicle.

k) The access roads must be able to with stand the weight of a 26 tonne refuse collection vehicle.

Case Officer comments: The above points have been included within an informative.

7. MAIN PLANNING ISSUES

7.01 The principle of the development

As stated in the assessment of the original outline application, the existing site is largely vacant, with the exception of part of the Shipping Building which was refurbished following the granting of planning permission in 2001. The applicant has provided a detailed and confidential review of the measures taken to market the immediately available Shipping

Building and the Cabinet Building, with both offers struggling to attract tenants. The report concludes that including a mixed use residential, retail and leisure offerings alongside the employment land within the scheme would improve the attractiveness of the commercial offer to potential B1 occupiers.

The proposed development was approved within this area of the site as part of the outline consent for the redevelopment of the wider site. Approved as part of the outline consent was a set of parameter plans, which included the parameters within which the buildings should be located. The proposed building is in accordance with the parameter plan in terms of height and footprint and as such, the use and scale of the building would be in accordance with the approved parameter plan which established the principle of the development as acceptable.

The principle of the development has already been approved at outline stage and was considered acceptable under the previous Reserved Matters Application reference 59872/APP/2015/1329.

7.02 Density of the proposed development

Density was considered as part of the originally approved outline application, and was deemed acceptable. The site wide density of the development is not proposed to change significantly as part of this application.

The outline application proposed a maximum of 510 residential units across the site. The current application proposes the erection of 189 units, which is an increase of 34 flats in this building compared to the original masterplan that proposed 155. This follows design development, including a more efficient layout, for the Material Store which now allows for an increase in the number residential units within the same building envelope, including the provision of three-storey units at street level on both side of the roads.

These changes have been subject to various lengthy pre-application discussions with officers at the Council. The consented Reserved Matters Application (reference 59872/APP/2015/1329) is for 183 units, and as such the current proposal intends an increase of only six units. As such the minimal change in density above that already approved is considered to be acceptable.

7.03 Impact on archaeology/CAs/LBs or Areas of Special Character

The impact on the heritage of the borough was considered as part of the originally approved outline application, and was considered acceptable, subject to conditions. The proposed building is not considered to impact on this previous assessment.

7.04 Airport safeguarding

The proposed development is within the height parameters approved at outline stage. BAA and NATS Safeguarding have reviewed the application and raise no objection to the application from an airport safeguarding perspective. As such, it is considered that the proposal would not impact on the safe operation of any airport.

7.05 Impact on the green belt

The site is not located within the Green Belt, so there are no Green Belt issues relating to this application.

7.07 Impact on the character & appearance of the area

The objectives for the wider site included in the master plan, include amongst other things, the promotion of a high quality scheme reflective of the area's general character as well as reinforcing local distinctiveness.

The site lies in the Hayes Botwell: Thorn EMI Conservation Area, and forms part of the old EMI factory site, which played an important part in the history of Hayes. It retains a number of large historic industrial buildings from the 19th and 20th centuries, a number of which are Locally Listed. Directly to the north is Enterprise House, an early concrete clad metal framed structure, which dates from the early 20th century and is grade II listed. This building has a very distinct appearance and is considered as a local landmark, it was also part of the original EMI site when first constructed.

The proposed new building has been subject to pre-application discussion with the Council's Conservation and Design Team. The height and footprint of the building are in accordance with the outline planning permission and the amendments approved under application reference 59872/APP/2015/1330.

The Council's Design Officer reviewed the previously approved proposals and commented that 'The current scheme is in line with previous and extensive discussions at pre application stage. Overall, this is considered to be a very well designed and carefully detailed large building.' They have raised no objections to the amended proposals.

This proposed building forms part of the masterplan for the regeneration of this particular site and to make a strong and positive architectural statement about the future of the area. The overall development is considered to be a well designed building which will have a positive impact on the visual amenities of the surrounding area, in accordance with Policies BE13 & BE19 of the Hillingdon Local Plan.

7.08 Impact on neighbours

The building proposed is located adjacent to the Great Western Railway Line and new buildings proposed within the wider TOVF site. The 'Boiler House' and the 'Pressing Plant' will be positioned between the proposal and existing residential properties on Blyth Road.

It should be noted that the consideration of potential impacts upon neighbours formed part of the assessment of the outline application. Matters considered include the construction impacts; traffic and car parking; noise and general disturbance; overlooking, outlook and overshadowing. The reserved matters are consistent with the details and principles considered at the outline stage which were considered acceptable on balance.

As such, the scheme is considered to be acceptable. The scheme accords with the UDP policies and design guidance which seek to protect the amenity of neighbours.

7.09 Living conditions for future occupiers

INTERNAL FLOOR AREA

The proposed development is for the creation of 189 flats within the site. Each of the dwellings would be erected in accordance with the floor space standards contained within Policy 3.5 of the London Plan (March 2015). Therefore, each dwelling would be considered to create residential accommodation of an acceptable size for the number of bedrooms and inhabitants being proposed.

EXTERNAL AMENITY SPACE

The overall amenity requirements of the proposed The Material Store are as follows:

1B - 20sqm per dwelling x 59units - 1180sqm

2B - 25sqm per dwelling x 106 units - 2650sqm

3B - 30sqm per dwelling x 24 units - 720sqm

Total amenity requirement- 4550sqm

The majority of the amenity space for the Materials Store is proposed within the public podium on level 1, shared terrace and private terraces on Level 2, and the four public roof gardens on the top of each residential block. In addition to this, balconies are provided to individual flats, adding a further 336sqm of amenity space provision to the building.

In addition to space provided for residents of The Material Store, an additional 298sqm of amenity space is to be incorporated to provide for requirements of residents of The Boiler House, who will have controlled access to the podium garden and playspace via the concierge entrance on Powerhouse Lane.

Total amenity requirement (including provision for Boiler House residents)- 4848sqm

Total amenity provision - 4836sqm

There is therefore a shortfall of 12sqm in external amenity provision across The Material Store and The Boilerhouse developments. The proposed shared amenity space for the flats will be a mixture of formal and informal space that will provide an attractive setting for the new apartment blocks. Given the high quality of the landscaping proposed throughout the wider site and the creation of new spaces that will benefit both future residents and workers, this minimal shortfall in provision is deemed acceptable.

Therefore, the proposed development is considered to be provided with sufficient outdoor amenity space for the occupiers of the development, in accordance with Policy BE23 of the Hillingdon Local Plan.

LIGHT AND OUTLOOK

All of the habitable rooms within the dwellings would be provided with an acceptable source of light and outlook in accordance with Policies BE20 of the Hillingdon Local Plan and 3.5 the London Plan (2015).

OVERLOOKING

In terms of outlook for future residents, Policy BE21 of the Local Plan seek to ensure that new development would not have a significant loss of residential amenity, by reason of the siting, bulk and proximity of new buildings.

In this regard, it is considered that the site layout would provide a high standard of amenity for future occupiers. The layout provides sufficient space within the block and ensures that there is adequate separation between the units. This will result in a satisfactory outlook from the proposed units in the block and reduces the potential for nuisance and disturbance to the future occupiers. As such, the development is considered to be consistent with relevant design guidance and policies BE21 and OE1 of the UDP.

All of the units would benefit from an acceptable level of privacy and light, in compliance with the Council's standards given in The Hillingdon Design and Accessibility Statement (HDAS) 'Residential Layouts'.

7.10 Traffic impact, Car/cycle parking, pedestrian safety

Part of the consideration of the outline application included means of access for the entire site. The Council's Highways Engineer and TFL have considered the traffic and parking impacts of the scheme on the surrounding area. The outline application was specifically supported by a transport assessment and travel plan along with drawings detailing access, turning (refuse vehicle swept paths) and parking (cars, bicycles, car club, motorcycle allowance, 10% accessible parking provision allowance). In addition, appropriately worded conditions of approval in respect of traffic management, parking numbers and allocation for example were imposed on the outline consent.

It should be noted that matters relating to access and layout were approved under the outline consent and access was amended under application reference 59872/APP/2015/1330. All potential transport impacts of the scheme were considered at the outline stage with details for on-site matters being secured as part of planning conditions, and no significant changes or differences are posed in the current application.

The reserved matters application for landscaping and appearance for this phase accords with the outline permission. The hard and soft landscaping, including car parking locations, road layout and widths, landscaping, as well as access, are consistent with the outline proposal and details approved under application reference 59872/APP/2015/1330.

Whereas the proposal only provides 2 extra parking spaces for six residential units the parking level must be viewed in the context of the overall parking levels for the material store. In this regard, and given the proximity to Hayes Station 177 parking spaces to serve 189 residential units is considered acceptable.

The current application relates to appearance and landscape only and the details provided for the consideration of the current application are deemed acceptable. The Council's Highways Engineer has been consulted on the current application and raised no objection to the proposals.

7.11 Urban design, access and security

It is considered that there are no urban design or security issues arising from the proposal. The Metropolitan Police have been consulted on the proposals and raised no objections to the details submitted.

7.12 Disabled access

All homes are designed to ensure adaptability to the changing needs of the household as well as ease of access for family and friends who might have a disability, as required by the London Plan.

10% of the units will be easily adaptable to wheelchair housing standards and will be provided in a range of sizes reflecting the mix provided in the building.

1B - 4 adaptable units
2B - 14 adaptable units
3B - 1 adaptable unit

The scheme would provide for an accessible building on all floors with the provision of DDA compliant lifts to access the upper floors of the building. Level access is provided from the building to the external areas and to the car parking areas. All new doors and finishes will fully comply with Part M of the Building Regulations.

The Council's Access Officer has been consulted on the proposals and raised no objections to the details submitted. The accessibility of the scheme is equal to that already approved under the previous reserved matters application and accordingly the scheme is considered to be consistent with Policies R16 and AM15 of the Hillingdon Local Plan: Part Two Saved UDP Policies (November 2012).

7.13 Provision of affordable & special needs housing

As per the original outline approval, the applicant proposes to provide 5% social/affordable housing within Phase 3 of the development. The quantum of affordable housing has been dictated by the Viability Assessment and given that the Assessment has been independently assessed and found to be robust, this level of provision is considered acceptable in this context. It will continue to be secured through the accompanying S106 legal agreement. As such the current phase of development is not required to provide affordable housing.

7.14 Trees, landscaping and Ecology

Trees and landscaping have been implicit in the scheme from pre-application discussion through to the consideration of the outline scheme, and were considered as part of the outline application.

The landscaping proposals include the provision of areas of hard and soft landscaping around the building, including along the boundary of the site, and the planting of new trees along the site frontage. The proposal also includes the permanent landscaping of the amenity space.

The Council's Trees and Landscape Officer has reviewed the proposals and subject to an additional clause requiring the need for an annual check on plant health and the need to replace any planting which fails (which has now been included) raised no objections to the proposals.

As such, the overall landscaping proposal is considered to be in accordance with the character of the surrounding area in accordance with Policy BE38 of the Hillingdon Local Plan.

7.15 Sustainable waste management

The sustainable waste features of the proposed development were considered as part of the outline application. The application was supported by a Waste Strategy, Waste Management Plan as well as drawings describing waste vehicular access into the site. In the course of considering the outline scheme, the Highways and Waste teams confirmed that waste arrangements could be suitably accommodated on the site.

7.16 Renewable energy / Sustainability

Given the proposed change in phasing, it has been agreed with Council Officers that the Energy Centre will be brought forward. The current proposal will be built to connect to the site wide energy network following the construction of the Power House.

Conditions imposed on the outline consent included details for renewable energy and sustainability. These details have been considered by the Council's Sustainability Officer for the current phase of development and are deemed acceptable.

7.17 Flooding or Drainage Issues

Flood risk and the drainage of the site, including sustainable drainage was considered as part of the originally approved outline application, and was considered acceptable, subject to conditions. The proposed development does not impact on this previous assessment.

7.18 Noise or Air Quality Issues

Noise and air quality aspects were considered as part of the outline application. The Environmental Statement submitted as part of the outline application considered the potential noise and air quality impacts associated with the development and appropriately worded conditions of approval were imposed on the outline planning permission. The Council's Environmental Protection Unit confirmed they would continue to control these detailed design aspects through the discharge of conditions and as such, there are no issues to consider in the subject application for reserved matters.

7.19 Comments on Public Consultations

No public responses were received as a result of the consultation on this application.

7.20 Planning obligations

The planning obligations for the development of the site were secured as part of the Outline Planning Permission and the subsequent application to vary the phasing.

7.21 Expediency of enforcement action

No enforcement action is required in relation to this application.

7.22 Other Issues

There are no other issues.

8. Observations of the Borough Solicitor

General

Members must determine planning applications having due regard to the provisions of the development plan so far as material to the application, any local finance considerations so far as material to the application, and to any other material considerations (including regional and national policy and guidance). Members must also determine applications in accordance with all relevant primary and secondary legislation.

Material considerations are those which are relevant to regulating the development and use of land in the public interest. The considerations must fairly and reasonably relate to the application concerned.

Members should also ensure that their involvement in the determination of planning applications adheres to the Members Code of Conduct as adopted by Full Council and also the guidance contained in Probity in Planning, 2009.

Planning Conditions

Members may decide to grant planning consent subject to conditions. Planning consent should not be refused where planning conditions can overcome a reason for refusal. Planning conditions should only be imposed where Members are satisfied that imposing the conditions are necessary, relevant to planning, relevant to the development to be permitted, enforceable, precise and reasonable in all other respects. Where conditions are imposed, the Council is required to provide full reasons for imposing those conditions.

Planning Obligations

Members must be satisfied that any planning obligations to be secured by way of an agreement or undertaking pursuant to Section 106 of the Town and Country Planning Act 1990 are necessary to make the development acceptable in planning terms. The obligations must be directly related to the development and fairly and reasonably related to the scale and kind to the development (Regulation 122 of Community Infrastructure Levy 2010).

Equalities and Human Rights

Section 149 of the Equalities Act 2010, requires the Council, in considering planning applications to have due regard to the need to eliminate discrimination, advance equality of opportunities and foster good relations between people who have different protected characteristics. The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The requirement to have due regard to the above goals means that members should consider whether persons with particular protected characteristics would be affected by a proposal when compared to persons who do not share that protected characteristic. Where equalities issues arise, members should weigh up the equalities impact of the proposals against the other material considerations relating to the planning application. Equalities impacts are not necessarily decisive, but the objective of advancing equalities must be taken into account in weighing up the merits of an application. The weight to be given to any equalities issues is a matter for the decision maker to determine in all of the circumstances.

Members should also consider whether a planning decision would affect human rights, in particular the right to a fair hearing, the right to respect for private and family life, the protection of property and the prohibition of discrimination. Any decision must be proportionate and achieve a fair balance between private interests and the public interest.

9. Observations of the Director of Finance

None

10. CONCLUSION

The application seeks to discharge the reserved matters relating to appearance and landscaping in compliance with conditions 2 and 3 of planning permission ref. 59872/APP/2013/3775 for of Phase 2 of The Old Vinyl Factory Masterplan: The Material Store.

The application site forms part of The Old Vinyl Factory site for which outline consent was granted under application reference 59872/APP/2012/1838, and varied under application reference 59872/APP/2013/3775, for the mixed-use redevelopment of the site.

The Reserved Matters application site is located centrally within the wider site, directly to the south of the Power House (formerly known as the Neptune) which is a locally listed building

The Materials Store site has already been granted Reserved Matters consent under application reference 59872/APP/2015/1329 (dated 7th August 2015). However the applicant would like to make some changes to the approved scheme, including the provision of six additional units with internal layout and elevation alterations.

The proposed development has been designed in accordance with the parameter plan and design code, which were approved at outline stage. The design and appearance of the building is considered to have a positive impact on the visual amenities of the surrounding area and the urban form of the development has improved since the outline stage.

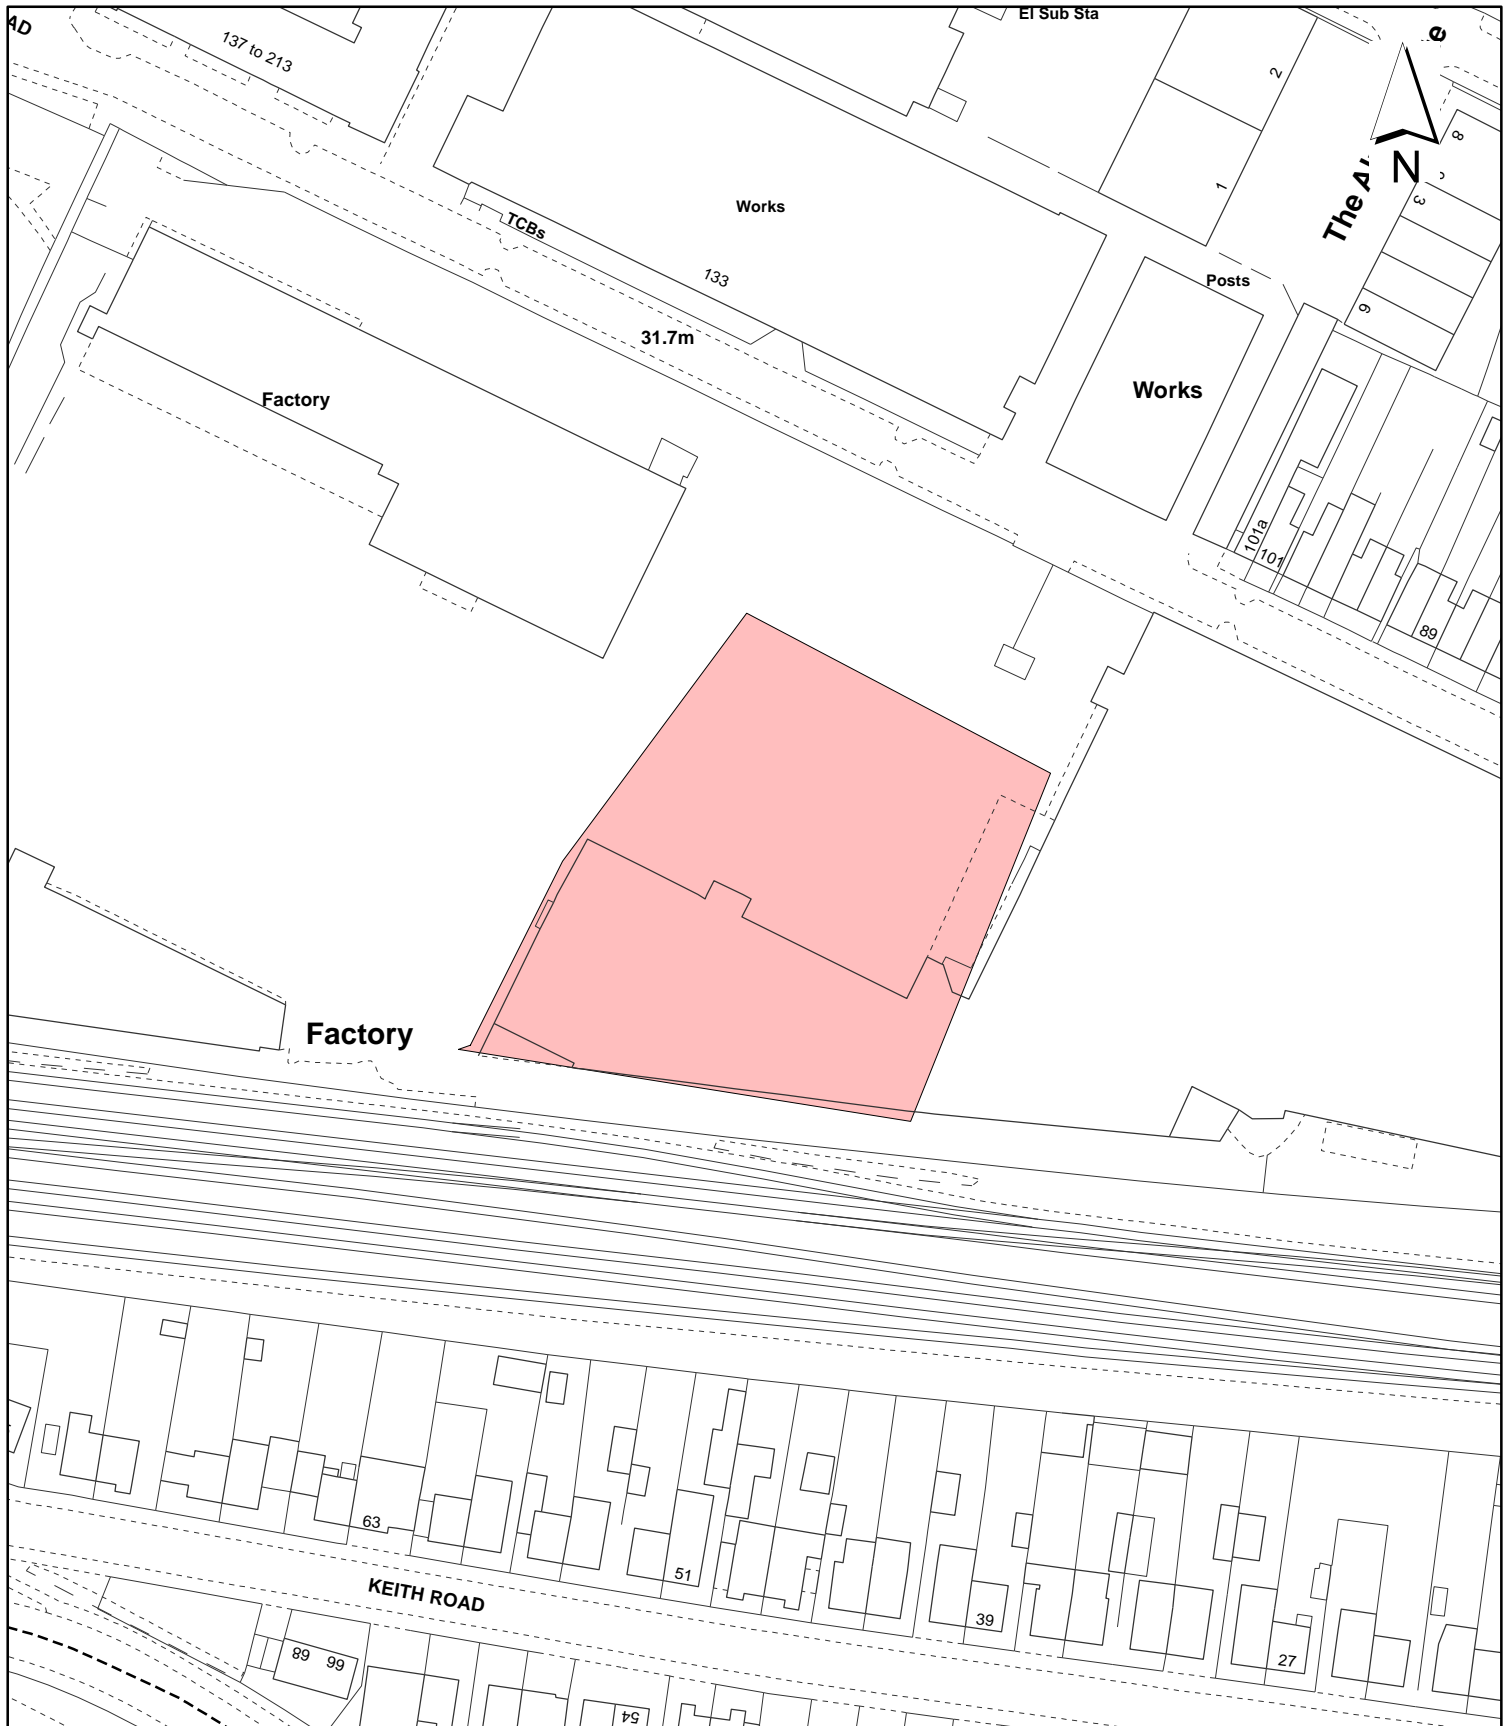

The overall development is in accordance with the outline consent and varies only minimally from the already consented Reserved Matters Application. Therefore, the application is recommended for approval.
