Papers with this report	Pension Fund Risk Register Q3

REASON FOR ITEM

The purpose of this report is to identify to the Pension Committee the main risk's to the Pension Fund, to enable them to monitor and review going forward (see Appendix).

OPTIONS AVAILABLE TO PENSION COMMITTEE

1. **Committee is asked to consider the attached Risk Register in terms of the approach, the specific risks identified and the measures being taken to mitigate those current risks. There are no risks currently rated as red.**

Information

The specific risk matrix for the Pension Fund allows better classification of the risks than would be possible through the Council's standard risk matrix. The significance of risks is measured by interaction of the likelihood of occurrence (likelihood) and by the potential damage that might be caused by an occurrence (impact). The risks are also RAG rated to identify level.

There are currently 7 risks being reported upon. Whilst there are many more risks which could be identified for the Fund, those identified are the most significant and those which are actively managed.

Each risk has been explained, along with details of the actions in place to mitigate that risk. The progress comment column provides the latest update in respect of the impact of those mitigating actions. The Direction of Travel (DOT) has also been included.

Risk PEN07 - Failure to invest in appropriate vehicles as a result of MiFID II, has been reduced to reflect the lower likelihood, due to the successful completion of the opt up in 2018; however there remains an ongoing risk due to changes in Committee members and officers which would require status to be reviewed.

FINANCIAL IMPLICATIONS

The financial implications are contained within the body of the report

LEGAL IMPLICATIONS

The legal implications are mentioned within the report.
