A separate Officer and Advisor working group, Investment Strategy Group (ISG) has been formed to regularly monitor the investment strategy and to develop proposals for change / adjustment for Pension Committee consideration. The impact of each decision is carefully tracked against the risk budget for the Fund to ensure that long-term returns are being achieved and are kept in line with liabilities.	Strategic risk Likelihood = Low Impact = Large Rating = E2 (Static)	Sian Kunert / Cllr M Goddard
PEN 03 - Active investment manager under-performance relative to benchmark	<ol style="list-style-type: none"> 1. The structure includes active and passive mandates and several managers are employed to diversify the risk of underperformance by any single manager. 2. Short term investment monitoring provides alerts on significant changes to key personnel or changes of process at the manager. 3. Regular monitoring measures performance in absolute terms and relative to the manager's index benchmark, supplemented with an analysis of absolute returns against those underpinning the valuation. 4. Investment managers would be changed following persistent or severe under-performance. 	The Fund is widely diversified, limiting the impact of any single manager on the Fund. Active monitoring of each manager is undertaken with Advisors and Officers meeting managers on a quarterly basis and communicating regularly. The LCIV as pool is increasingly managing more assets on the funds behalf as per regulation, however transparency and reporting is less controlled by the fund. Improvements in communication from the pool have been requested over performance transparency of the managers to inform swift action. Comments on whether mandates should be maintained or reviewed are included and where needed specific performance issues will be discussed and reviewed.	Strategic risk Likelihood = Low Impact = Small Rating = E4 (Static)	Sian Kunert / Cllr M Goddard

<p>PEN 06 - Pensioners living longer.</p>	<p>1. Mortality assumptions are set with some allowance for future increases in life expectancy. Sensitivity analysis in triennial valuation helps employers understand the impact of changes in life expectancy.</p> <p>2. Club Vita monitoring provides fund specific data for the valuation, enabling better forecasting.</p>	<p>The Fund is part of Club Vita, a subsidiary of the Fund Actuary, which monitors mortality data and feeds directly into the valuation.</p> <p>In addition, further mortality monitoring is undertaken by CEB, the fund's administrators.</p>	<p>Strategic risk Likelihood = Low Impact = Small Rating = E4 (Static)</p>	<p>Sian Kunert / Cllr M Goddard</p>
