

## **MOTIONS**

### **7.1 MOTION FROM COUNCILLOR FARLEY**

That this Council asks the Cabinet Member for Residents Services to fix the current gap in co-ordination between Waste Services and Green Spaces so that litter is removed before grass cutting is scheduled.

### **7.2 MOTION FROM COUNCILLOR PUNJA**

That this Council notes that the Grenfell Tower Inquiry report condemned unscrupulous manufacturers, a cost-cutting council and reckless deregulations for the disaster in Britain's worst residential fire since World War II killing 72 people.

For the benefit of public safety, this Council acknowledges that there are a number of residential buildings within the borough that are still subject to fire safety remediation from unsafe cladding to wooden balconies and other flammable materials, and instructs officers to provide the Corporate Resources and Infrastructure Select Committee with an up to date list of all these buildings, reporting and monitoring on their remediation progress until such time that all residential buildings in the borough meet the required fire safety standards.
