Summary	To consider the draft joint Hillingdon Health and Wellbeing Priorities 2025-2028
Contribution to plans and strategies	Joint Health & Wellbeing Strategy
Financial Cost	None
Relevant Select Committee	N/A
Ward(s) affected	N/A

2. RECOMMENDATION

That the Health and Wellbeing Board discusses and comments on the draft joint Hillingdon Health and Wellbeing priorities for 2025-2028, attached at Appendix A.

3. INFORMATION

Supporting Information

The purpose of the appended document is act as a starting point to stimulate discussion on the draft priorities for the Joint Hillingdon Health and Wellbeing Strategy for the period 2025-2028. This 'first cut' has been informed by:

- The North West London Shared Needs Assessment (2024) and the Core20Plus 5 Framework
- The NWL ICB Joint Forward Priorities
- The HHCP Strategic Priorities
- The LBH Adult Social Care and Health Plan 2024-2027
- The Hillingdon Hospital Redevelopment Plan
- LBH Council Strategy 2022-2026

Draft metrics to measure the success for the Strategy are also included. Feedback from the Board discussion will inform the first Draft Joint Health and Wellbeing Strategy.

Background

Health outcomes for the people of Hillingdon are shaped by a complex interaction of factors, including health behaviours (30%) socioeconomic conditions (40%), the built environment (10%), and clinical care access (20%). Specifically:

- Modifiable health behaviours (diet, physical activity, smoking, alcohol use) are major contributors to chronic diseases.
- Socioeconomic factors (income, education, employment, and social support) influence access to healthcare and drive health inequality and disparities.
- The Built Environment (housing, neighbourhood safety, recreational spaces, and food access) impacts lifestyle choices and overall well-being.
- Clinical Care Access and Quality play a crucial role in preventing and managing diseases, reducing mortality and morbidity.

The Marmot Report highlights how social determinants drive health inequalities across England, with disadvantaged groups experiencing poorer health outcomes. Addressing these disparities is essential for public health improvement. A comprehensive, integrated approach is necessary to promote health equity, effective public health strategies and to tackle unsustainable rising health and social care utilisation in Hillingdon.
